

Brand, assets and final links

Links to place in the deck

Item	Link / file	Use
Live demo	https://saathi-drab.vercel.app	Slides 8 and 12; test the final QR before export
API	https://saathi-api-gm4i.onrender.com	Slide 12 small text or speaker notes; a sleeping free instance may need to wake
Repository	https://github.com/adityasinghin01-hash/saathi	Slide 12; public since 29 Sep 2026
Saathi logo	frontend/public/art/logo.svg	Use the original SVG at its natural proportions
Screenshot map	03-SCREENSHOTS.md	Use the supplied captures only; ignore S21
Diagram source	_build/diagrams.py	Claude will render D1–D6; do not present the PDF as a separate product

Illustrations

Original image assets in `frontend/public/art/`:

File	Suggested use
home.webp	Home / patient context
centre.webp	PHC context
shelf.webp	Stockout / shelf context
van.webp	Transfer journey
medkit.webp	Medicine handover

Use these as illustrations, never as evidence that a vehicle, medicine or field clinic was photographed. Keep the screenshots' own **Synthetic demo data** label or add it beside a crop.

Colours — exact light-theme CSS tokens

Source: [frontend/src/styles/saathi.css](#). Use the light theme for the slides; do not approximate the hex values.

Use	Token	Hex
Main background	<code>--paper</code>	<code>#fbf4ea</code>
Raised surface	<code>--paper-raised</code>	<code>#fffaf3</code>
Soft inset	<code>--paper-sunk</code>	<code>#f4e9da</code>
Main text	<code>--ink</code>	<code>#2e2119</code>
Secondary text	<code>--ink-muted</code>	<code>#6a5444</code>
Strong clay	<code>--clay-500</code>	<code>#bf5630</code>
Button/diagram clay	<code>--clay-600</code>	<code>#b04a24</code>

Use	Token	Hex
Dark clay	<code>--clay-700</code>	<code>#8f3a1b</code>
Light clay	<code>--clay-100</code>	<code>#f8e2d4</code>
Marigold	<code>--marigold-400</code>	<code>#f2a93b</code>
Light marigold	<code>--marigold-100</code>	<code>#fdefd3</code>
Leaf	<code>--leaf-400</code>	<code>#6d8a5a</code>
Light leaf	<code>--leaf-100</code>	<code>#e6eedc</code>
Out of stock text / background	<code>--status-out</code> , <code>--status-out-bg</code>	<code>#a3231b</code> , <code>#fbe4df</code>
Low stock text / background	<code>--status-low</code> , <code>--status-low-bg</code>	<code>#7a4d00</code> , <code>#fcefcf</code>
OK text / background	<code>--status-ok</code> , <code>--status-ok-bg</code>	<code>#0f635b</code> , <code>#dcefea</code>
Waiting text / background	<code>--status-wait</code> , <code>--status-wait-bg</code>	<code>#5e554e</code> , <code>#ece5dd</code>
Divider	<code>--line</code>	<code>#e8d9c6</code>

Type and bilingual copy

- Display: **Baloo 2** with **Baloo 2 Devanagari** fallback. Body: **IBM Plex Sans** with **IBM Plex Sans Devanagari** fallback. The exact CSS families are `--font-display` , `--font-sans` and `--font-hindi` in [saathi.css](#).
- Keep **Hindi + English on every visible diagram and UI label**. Pair them directly, for example **Reported / रिपोर्ट दर्ज**, **Verify / जाँच**, **Approve / मंजूरी**, **Stock age / स्टॉक कब का**. For a crowded chart, use a bilingual legend keyed to compact symbols, not tiny Devanagari.
- The wordmark is **Saathi · साथी**. Retain the Hindi script; do not make “Hindi-first” claims from S21 or S23. S23 has a Hindi transcript while its interface language is English.
- Use sentence case and plain words. Medical terms such as “metformin” can keep their English spelling alongside the Hindi label.

Label rules

1. Put **Synthetic demo data** on every slide with app screens, synthetic people, stock values, the Ramesh story or evaluation. If a screenshot crop removes the built-in badge, place the exact label outside the crop.
2. Put **Synthetic simulation** directly on slide 7's forecast chart. The forecast table is a simulator outcome, not a patient impact figure.
3. Put **BUILT PROTOTYPE** on current functions and **NOT BUILT — ROADMAP** on slide 11 and every future function in D6. A planned pilot is **PROPOSED PILOT**, not a deployed site.
4. Keep source and denominator near a number: “up to 16/20 sampled drugs at test-checked UP PHCs,” “1 in 3 baseline simulation runs,” and “12 synthetic TTS clips.”
5. Never use a stock icon or illustration as a substitute for a cited stockout result. Cite the [claims ledger](#).
